Standards for Use, according to Use Categories

updated on Nov.7,2023

-The table below is an English translation and compilation of "the Standards for Use of Food Additives" issued by Minister for Health, Labour and Welfare, Government of Japan along with related information as reference materials for deepening the understanding of users. In case of any discrepancy between the Japanese original and the English translation, the former will take priority. It is recommended to refer to the official government documents when utilizing the contents of this table.

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
Acidifiers	Acetic Acid	All foods		
	Acetic Acid, Glacial			
	Adipic Acid			
	Citric Acid			
	Fumaric Acid	_		
	Gluconic Acid	_		
	Glucono-δ-Lactone			
	Lactic Acid	—		
	DL-Malic Acid	—		
	Succinic Acid	—		
	D-Tartaric Acid			
	DL-Tartaric Acid			
Anti-caking	Ferrocyanides of Calcium,	Salt	Individually or in	
	Potassium and Sodium		combination,	
			0.020g/kg as anhydrous sodium	
			ferrocyanide	
Anti-foaming agent	Silicone resin	All foods	0.050 g/kg	Only for defoaming.
Anti-molding agents	Azoxystrobin		as maximum residue limit	
		Citrus fruits (except for UNSHU	0.010 g/kg	
		orange)	0.007 #/b#	
	Difenoconazole	Potato Potato	0.007 g/kg 0.004g/kg	
			as maximum	
	Diphenyl	Grapefruit	residue limit 0.070 g/kg	
	2	Lemon	0.070 g/kg	
		Orange	0.070 g/kg	
	Fludioxonil	Kiwifruit Pineapple (except for crown bud)	0.020 g/kg	
		Citrus fruits (except for UNSHU orange)	0.010 g/kg	
		Potato	0.0060 g/kg	
		Apple Apricot (except for seeds) Avocado (except for seed) Cherry (except for seeds) Japanese plum (except for seeds) Loquat Mango (except for seed) Nectarine (except for seeds) Papaya Pear Peach (except for seeds) Pomegranate Quince	0.0050 g/kg	
	Imazalil		as maximum residue limit	
		Banana	0.0020 g/kg	
		Citrus fruits (except for UNSHU orange)	0.0050 g/kg	
			as maximum	
	<i>o−</i> Phenylphenol	Citrus fruits	residue limit of <i>o-</i> 0.010 g/kg	
	Sodium <i>o</i> -Phenylphenol			

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
Anti-molding agents	Propiconazole	Citrus fruits(except for UNSHU	as maximum residu	ue limit
(continued)		orange)	0.008g/kg	
		Apricot (eliminate seeds)	0.004g/kg	
		Nectarin (eliminate seeds)		
		Peach (eliminate seeds)		
		Cherry (eliminate peduncle and seed	l s)	
		Japanese plum (eliminate seeds)	0.0006g/kg	
	Pyrimethanil		as maximum residu	le limit
	, yr moenann	Apricot	0.010 g/kg	
		Cherry		
		Citrus fruits (excpt UNSHU orange) Japanese plum (including prune)		
		Peach		
		Apple	0.014 g/kg	1
		Pear Quince		
	Thisbandazala	Guillo		lo limit
	Thiabendazole		as maximum residu	
		Banana (whole)	0.0030 g/kg	
		Banana (pulp) Citrus fruits	0.0004 g/kg	
Antioxidants	L-Ascorbic Acid	All foods	0.010 g/kg	
, inclosidantes	L-Ascorbyl Palmitate			
	-	4		
	L-Ascorbyl Stearate		DUA	
	Butylated Hydroxyanisole (BHA)		as BHA	
		Butter	0.2 g/kg	When BHA is used in
		Fats & oils	0.2 g/kg	combination with BHT, the total amount of both shall
		Fish & shellfish (dried)	0.2 g/kg	exceed the corresponding
		Fish & shellfish (salted)	0.2 g/kg	limit.
		Fish & shellfish (frozen)	1 g/kg of dip	
		(except frozen products cosumed ra	aw)	
		Mashed potato (dried)	0.2 g/kg	
		Whale meat (frozen)	1 g/kg of dip	
		(except frozen products cosumed ra		
	Butylated Hydroxytoluene		as BHA	
		D. std. su		When BHA is used in
	(BHT)	Butter Chewing gum	0.2 g/kg 0.75 g/kg	combination with BHT, the
		Fats & oils	0.75 g/kg 0.2 g/kg	total amount of both shall exceed the corresponding
		Fish & shellfish (dried)	0.2 g/kg	limit.
		Fish & shellfish (salted)	0.2 g/kg	
		Fish & shellfish (frozen)	1 g/kg of dip	
		(except frozen products		
		cosumed raw)	0.2 ~/1-=	
		Mashed potato (dried) Whale meat (frozen)	0.2 g/kg 1 g/kg of dip	
		(except frozen products	s/ Ng OI uiμ	
		cosumed raw)		
	Calcium L-Ascorbate	All foods	1	1
	Calcium Disodium		as EDTA-CaNa2	
	Ethylenediaminetetraacetate	Canned and bottle non-alcoholic beverages	0.035 g/kg	
		Other canned and bottle foods	0.25 g/kg	
	L-Cysteine Monohydro-	Bread		All foods as CHOMIRYO
	chloride	Fruit juice		(seasoning)
	Disodium Ethylene- diaminetetraacetate	Canned and bottle non-alcoholic	as EDTA-CaNa2 0.035 g/kg	Shall be chelated with cal ino before the preparation
		beverages	0.05	the finished food.
	1	Other canned and bottled foods	0.25 g/kg	

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
Antioxidants (continued)	Erythrobic Acid	Fish paste products (excluding SURIMI) Bread Other food		Not permitted for nutritive purposes in fish paste products (excluding SURIMI) or bread. Only for antioxidizing purposes in other foods.
	Isopropyl Citrate		as monoisopropyl citrate	
		Butter Fats and oils	0.10 g/kg 0.10 g/kg	
	Guaiac Resin	Butter	1.0 g/kg	
		Fats and oils		
	Propyl Gallate	Butter	1.0 g/kg 0.10 g/kg	
		Fats and oils	0.20 g/kg	
	Sodium L-Ascorbate	All foods	0.20 8/18	
	Sodium Erythorbate	Fish paste products (excluding		Not permitted for nutritive
		SURIMI) Bread Other food		purposes in fish paste products (excluding SURIMI) or bread. Only for antioxidizing purposes in other foods.
	dl-α-Tocopherol	All foods		Conly for antioxidizing, except when included in preparation of β -Carotene, Vitamin A, Vitamin A Esters of Fatty Acids, or Liquid Paraffin.
Antisticking	D-Mannitol	Candies Chewing gum FURIKAKE (sprinkleover only products containing granules) RAKUGAN (dried rice-flour cakes) TSUKUDANI (food boiled down in soy sauce, only products made of KONBU (kelp))	40% 20% 50 % of granules 30% 25 % (as maximum residue limit)	* When used in formula with Potassium Chloride and Glutamate for seasoning foods or enhancing their original flavor, no limits are specified. (only cases where D- Mannitol does not exceed 80 % of the sum of Potassium Chloride, Glutamates and D- Mannitol)
		All foods as CHOMIRYO (seasoning)		
Bleaching agents Sterilizer	Hydrogen Peroxide	Whitebait simply scalded, Dried whitebait	less than 0.005g/kg(as maximum residue limit)	
		All foods		Shall be removed or decomposed before the preparation of the finished
Bleaching agents	Sodium Chlorite	Cherry Citrus fruits (limited to those for confectionary) FUKI Grape Peach		Shall be removed or decomposed before the preparation of the finished food.
		Eggs (limited to the part of egg shell Processed KAZUNOKO (Herring roe products) (except for dried KAZUNOKO and freezed KAZUNOKO) Vegetables dor direct consumption	0.50 g/kg dipping	
Sterilizer		Meat Meat products	0.50g~1.20g/kg dipping solution or spray liquid (as sodium chlorite)	dipping solution or spray liquid of pH 2.3 \sim 2.9 shall be used within 30 seconds, and shall be removed or decomposed before the preparation of the finished food.

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
Bleaching agents		AMANATTO:dried candied beans	Residue limit of SO2 less than: 0.10 g/kg	
	Data a line Dama difta		0.00	Not permitted in legumes/pulses, sesame
	Potassium Pyrosulfite	Candied cherry	0.30 g/kg	seeds, or vegetables.
		Dijon mustard	0.50 g/kg	
	Calling the base of the	Dried fruits (excluding raisins)	2.0 g/kg	When other foods (excluding
	Sodium Hydrosulfite	Raisins	1.5 g/kg	KONNYAKU) manufactured
	Sodium Pyrosulfite	Dried potato	0.50 g/kg	or processed, using foods like Dried fruits (excluding raisns)
	Sodium Sulfite	Food molasses	0.30 g/kg	listed in this section, in which
	Sulfur Dioxide	Frozen raw crab	0.10 g/kg	an additive listed in the left
		Gelatin	0.50 g/kg	column is used, according to the standards for use,
		KANPYO: dried gourd strips	5.0 g/kg	contain a residue of not less
		KONNYAKU-KO:powdered konjac	0.90 g/kg	than 0.030 g/kg as SO_{2} , the
		Miscellaneous alcoholic beverages	0.35 g/kg 0.20 g/kg	amount of residue shall be the maximum residue limit.
		MIZUAME (starch syrup)		the maximum residue limit.
		Natural fruit juice	0.15 g/kg	
		(confined to foods to be consumed		
		in 5-fold or more dilution) Prawn	$0.10 \sigma/k \sigma$	
		Simmered beans	0.10 g/kg 0.10 g/kg	
		Tapioca starch for saccharification	0.25 g/kg	
		Wine (any kind of fruit wine, excluding squeezed fruit juice containing alcohol of not less than 1% by volume which is used for manufacturing wine and a concentrate of the same.)	0.35 g/kg	
		Other foods (excluding cherry used for candied cherry, hop used for brewing beer, fruit juice used for manufacturing wine, and squeezed fruit juice containing alcohol of not less than 1 % by volume, and and a concentrate of the same.)	0.030 g/kg	
Chewing gum bases	Ester Gum	Chewing gum		Only as chewing gum base.
	Polybutene			* Polyvinyl Acetate may also
	Polyisobutylene			be used as film-forming.
	Polyvinyl Acetate*			See the section, "Film- forming agents."
Color fixatives	Ferrous Sulfate	All foods		
	Potassium Nitrate		less than:	
		Meat products	0.070 g/kg	
		Whale meat bacon		May be used as fermentation regulator. See the section,
		whate meat bacon	0.070 g∕kg (as residue	"Miscellenous."
			limit of NO2)	
	Sodium Nitrate	Same a	s for Potassium Nitr	rate.
			as maximum	
	Sodium Nitrite		residue limit of	
		Fish ham	nitrite 0.050 a/ka	
		Fish ham Fish sausage	0.050 g/kg 0.050 g/kg	
		IKURA (salted/processed	0.0050 g/kg	
		salmon roes)		
		Meat products	0.070 g/kg	
		SUJIKO (salted salmon roes)	0.0050 g/kg	
		TARAKO	0.0050 g/kg	
	1	Whale meat bacon	0.070 g/kg	

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
Color adjuvant	Ferrous Gluconate	Table olive	0.15 g/kg (as residue limit of iron)	May also be used as dietary supplement. See the section, "Dietary supplements"
	Magnesium Hydroxide			
Dietary supplements	L-Ascorbic acid 2-glucoside	All foods		
	Biotin	Formulated milk (dried, liquid)		
		Substitutes for human milk	10µg/100kcal	
		Foods for specified health uses, Foods with nutrient function claims		
	Bisbentiamine			
	Carcium Carbonate	All foods		
	Calcium Chloride	All foods	1.0 %	Only when indispensable for manufacturing or processing the food, or when used for nutritive purposes.
	Calcium Citrate	1		
	Calcium Dihydrogen Phosphate		The above limits	Only when indispensable for manufacturing or processing
	Calcium Dihydrogen Pyrophosphate		do not apply to foods approved	the food, or when used for nutritive purposes.
	Cacium Gluconate* Calcium Glycerophosphate*		to be labeled as ″special. dietary	*Only for nutritive purposes
	Calcium Hydroxide			Only when indispensable fo manufacturing or processin the food, or when used for
	Calcium Lactate			
	Calcium Monohydrogen Phosphat	All foods	as Ca 1.0% ** The above limits do not apply to foods approved to be labeled as "special. dietary	Only when indispensable for manufacturing or processing the food, or when used for nutritive purposes.
	Calcium Oxide	1	special. dietary	
	Calcium Pantothenate		as Ca 1.0%	
	Calcium Stearate		**	
	Calcium Sulfate		as Ca 1.0% **	Only when indispensable for manufacturing or processing the food, or when used for nutritive purposes.
	Cholecalciferol	All foods		
	Copper Gluconate	Substitutes for human milk	as copper 0.60 mg/L when formulated into a standard concentration.	The limit does not apply to cases where this additive is used in formulated milk und approval by the Minister of Health, Labour and Welfare.
		Foods for specified health uses, Foods with nutrient function claims	5 mg/recommended daily portion of each food	
	Cupric Sulfate	Substitutes for human milk	as copper 0.60 mg/L when formulated into a standard concentration.	The limit does not apply to cases where this additive is used in formulated milk und approval by the Minister of Health, Labour and Welfare.

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
Dietary supplements	Dibenzoyl Thiamine	All foods		
(continued)	Dibenzoyl Thiamine Hydrochlorid	_ le		
	Dry Formed Vitamin A	1		
	Ergocalciferol	-		
	Ferric Ammonium Citrate	-		
	Ferric Chloride	-		
		-		
	Ferric Citrate	1		
	Ferric Pyrophosphate			
	Ferrous Gluconate	Dried milk for pregnant and lactating women. Substitutes for human milk.		May also be used as colo adjuvant. See the section, "Color adjuvant."
		Weaning foods		aujuvant.
	Folic Acid	All foods		
	L-Histidine Monohydrochloride			
	Iron Lactate	1		
	L-Isoleucine			
	L-Lysine L-Aspartate			
	L-Lysine L-Glutamate			
	L-Lysin Monohydrochloride			
	Magnesium Hydroxide	1		
	Magnesium Monohydrogen	1		
	Phosphate DL-Methionine	-		
		-		
	L-Methionine	-		
	Methyl Hesperidin			
	Nicotinamide	All foods		Not permitted in fresh fish/shellfish (including fres
	Nicotinic Acid			whale meat) or meat.
	L-Phenylalanine	All foods		
	Pyridoxine Hydrochloride	1		
	Riboflavin	-		
	Riboflavin 5'-Phosphate	-		
	Sodium			
	Riboflavin Tetrabutyrate	1		
	Sodium Ferrous Citrate			
	Sodium Pantothenate			
	Sodium Selenite	Formulated milk (dried, liquid)		The limit does not apply to cases where this additive is
		Substitutes for human milk	as selen	used in substitutes for hum
			5.5 μ g∕100kcal	milk under approval by the Minister for Health, Labour and Welfare.
	Thiamine Dicetylsulfate	All foods		
	Thiamine DilauryIsulfate]		
	Thiamine Hydrochloride			
	Thiamine Mononitrate	4		
	Thiamine Naphthalene-			
	1, 5-disulfonate Thiamine Thiocyanate	4		
	DL-Threonine	4		
	L-Threonine	4		
	<i>all-rac-</i> α-Tocopheryl Acetate	Foods for specified health uses	as α−Tocopherol	Only foods for specified
	$R, R, R - \alpha$ -Tocopheryl Acetate	Foods with nutrient function claims	150 mg/recommended daily portion of	health uses and foods with nutrient function claims.

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
Dietary supplements (continued)	Tricalcium Phosphate	All foods	as Ca 1.00% The above limit do not apply to foods approved to be labeled as ″special. dietary	Only when indispensable for manufacturing or processing the food, or when used for nutritive purposes.
	DL-Tryptophan L-Tryptophan L-Valine Vitamin A Vitamin A Esters of Fatty Acids	All foods		
	Vitamin A in Oil Zinc Gluconate	Only substitutes for human milk	as zinc 6.0 mg/L When formulated into a standard concentration.	The limit does not apply to cases where these additives are used in formulated milk under approval by the Ministe of Health, Labour and Welfare
		Foods for specified health uses, Foods with nutrient function claims	15 mg/ recommended daily portion of each food	
		foods for the ill (which is categorized as "foods for special dietary uses")		
	Zinc Sulfate	Only substitutes for human milk	as zinc 6.0 mg/L When formulated into a standard concentration.	The limit does not apply to cases where these additives are used in formulated milk under approval by the Minist of Health, Labour and Welfar
Emulsifiers	Calcium Strearoyl Lactylate	as Calcium	Strearoyl Lactylate	
		Bread. Butter cakes. Confections (baked or fried wheat flour products only). Moist cakes (rice flour products		
		only). Macaroni and other such products.*	4.0 g/kg*	*as dry noodles.
		Mixed powder: for manufacturing bread. for manufacturing confections (fried wheat flour products only). for manufacturing confections	5.5 g/kg 5.5 g/kg 5.0 g/kg	When used in combination with calcium strearoyl lactylate and sodium strearoy lactylate, total level of the additives as calcium strearoy
		(baked wheat flour products only). for manufacturing moist cakes (rice flour products only). for manufacturing sponge cakes,	10 g/kg 8.0 g/kg	lactylate shall not be more than the maximum limit.
		butter cakes and steamed breads. for manufacturing steamed MANJYU (bun made by steaming wheat flour dough).	2.5 g/kg	
		Noodles (excluding instant noodles and dry noodles)		** as boiled noodles.
		Sponge cakes. Steamed bread (bread made by steaming wheat flour dough).	5.5 g/kg 5.5 g/kg	
	1		1	1

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
Emulsifiers	Polysorbate 20		as polysorbate 80	If it is used together with on
(continued)	Polysorbate 60	Capsule- and tablet-form foods	25 g/kg	of polysorbate 60, 65, and 80 the sum of each amount used
	Polysorbate 65	excluding confections Chewing gum	5.0 g/kg	shall be not more than the
	Polysorbate 80	Cocoa and chocolate products	5.0 g/kg	corresponding maximum leve
	Folysorbate 60			as polysorbate 80. The above
		Milk-fat substitutes	5.0 g/kg	standards are not applied for
		Sauces	5.0 g/kg	products that are approved of
		Seasonings for instant noodles	5.0 g/kg	recognized as foods for special dietary use.
		Shortening	5.0 g/kg	special dietaly use.
		Bakery confections	3.0 g/kg	Flour paste*: In this list, flou
		Decorations for confections	3.0 g/kg	paste is confined to paste
		(Sugar coatings and icings)		products of cocoa and
		Dressing	3.0 g/kg	chocolate that are prepared
		Ice creams	3.0 g/kg	with sugar, fat/oil, powder
		Mayonnaise	3.0 g/kg	milk, egg, or wheat flour as secondary ingridients, and
		Mix powder for bakery confections	3.0 g/kg	pasteurized. They are used a
		and moist sweet cake		fillings or coatings of bread of
		Moist sweet cake, unbaked cake	3.0 g/kg	bakery confections.

	Monoammonium L-Glutamate			
	Monocalcium Di-L-	All foods	as calcium	
	Glutamate		1.00%	
			Not applied to	
			foods approved to	
			be labeled as "special dietary	

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
Seasonings	Monomagnesium Di-L-	All foods		
(continued)	Glutamate			
	Monopotassium Citrate			
	Monopotassium L-			
	Glutamate			
	Monosodium L-Aspartate			
	Monosodium Fumarate			
	Monosodium L-Glutamate			
	Monosodium Succinate			
	Potassium Chloride	-		
	Potassium Gluconate	—		
	Potassium Lactate			
	Potassium Sulfate	-		
	Sodium Gluconate	-		
	Sodium Lactate	-		
	Sodium DL-Malate	-		
	L-Theanine	_		
	Tripotassium Citrate			
	Trisodium Citrate			
Solvents or extracting	Acetone	Fats and oils		Only for extracting
agents		Guarana nuts		components from such nuts i the process of the manufac- ture of guarana beverages or
				for fractionating components of fats or oils.
				Shall be removed before the preparation of the finished
	Glycerol	All foods		food.
	-	All loods		
	Hexane			Only for extracting fats or oils in manufacturing edible fats or oils. Shall be removed before the preparation of the finished food.
Stabilizer	Triethyl Citrate	Only capsule and tablet (except for chewable tablet).	3.5g/kg	not Sweet
		Egg pulp	2.5g/kg	
		Dried egg	2.0g/ Kg	
		Nonalcoholic beverages	0.2g/kg	
Sterilizer	Chlorous Acid Water	Milled rice	0.40g/kg dipping	Shall be removed or
		Legumes/pulses Vegetables (excluding mushrooms) Fruits Seaweeds	solution or spray liquid	decomposed before the preparation of the finished product.
		Fresh fish/ shellfish (including fresh whale meat) Meat Meat products Whale meat products Preserved products of foods listed above.		"The preserved products" means foods preserved by drying, salting, or other treatments.
	Dimethyl dicarbonate	Nonalcoholic beverages(except mineral water)	0.25g/kg	
		Fruit wine(except wine)	0.25g/kg	1
	High-Toot Hyperblauite	Wine All feedo	0.20g/kg	
	High-Test Hypochlorite	All foods		
	Hydrobromous Acid Water	Meat (except Chicken)	0.90g/kg dipping solution or spray liquid (as bromine)	Can be used only for sterilizing the surface of mea
		Chicken	0.45g/kg dipping solution or spray liquid (as bromine)	
	1–Hydroxyethylidene–1•1– Diphosphonic Acid			Can be used only as peraceti acid formulation

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
Sterilizer (continued)	Hypochlorous Acid Water			Shall be decomposed or removed before the preparation of the finished
				food.
	Sodium Hypochlorite			Not permitted in sesame.
	Peracetic Acid			Can be used only as peracetic acid formulation
	Peracetic Acid Formulation	chicken beef and pork	acid) and 0.136g/kg dipping solution or spray liquid (as 1- hydroxyethylidene -1,1-disulphonic acid) 1.80g/kg dipping solution or spray liquid (as peracetic acid) and 0.024 g/kg dipping	Can be used only for sterilizing the surface of beef, chicken, pork fruits and vegetables.
			solution or spray liquid (as 1- hydroxyethylidene -1,1-disulphonic acid)	
		fruits and vegetables	0.080g/kg dipping solution or spray liquid (as peracetic acid) and 0.0048 g/kg dipping solution or spray liquid (as 1- hydroxyethylidene -1,1-disulphonic acid)	
Flavoring agents or Peracetic acid formulation	Octanoic acid			Can be used only for flavoring and the use as peracetic acid formulation
Thickening agents or	Acetylated Distarch Adipate	All foods		
stabilizers	Acetylated Distarch Phosphate	All foods		
	Acetylated Oxidized Starch	All foods		
	Ammonium Alginate	All foods		
	Calcium Alginate	All foods		
	Calcium Carboxymethylcellulose	All TOODS	2.00%	When used with one or more of the following additives, the total amount shall not be more than 2.0 % : Methyl Cellulose, Sodium Carboxymethylcellulose, and Sodium Carboxymethyl–strach
	Distarch Phosphate	All foods		
	Hydroxypropyl Distarch Phospha	All foods		
	Hydroxypropyl Starch	All foods		
	Methyl cellulose	All foods	2.00%	When used with one or more of the following additives, the total amount shall not be more than 2.0 %: Calcium Carboxymethyl- cellulose, Methyl Cellulose, and Sodium Carboxymethyl- strach.
	Monostarch Phosphate	All foods		

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
hickening agents or	Oxidized Starch	All foods		
stabilizers	Phosphated Distarch Phosphate	All foods		
(continued)	Polyvinylpyrroridone	Capsule- and tablet-form foods excluding confections		except for confectionary
	Potassium Alginate	All foods		
	Propylene Glycol Alginate	All foods	1.00%	
	Starch Sodium Octenyl Succinate			
	Starch Acetate	All foods		
	Sodium Alginate	All foods		
	Sodium Carboxymethylcellulose	All foods	2.00%	When used with one or more of the following additives, th total amount shall not be more than 2.0 %: Calcium Carboxymethyl- cellulose, Methyl Cellulose, and Sodium Carboxymethyl- strach.
	Sodium Carboxymethylstarch	All foods	2.00%	
				When used with one or more of the following additives, the total amount shall not be more than 2.0 %: Calcium Carboxymethyl- cellulose, Methyl Cellulose, and Sodium Carboxymethyl- cellulose.
	Sodium Polyacrylate	All foods	0.20%	
liscellaneous	Active Carbone	All foods		
Absorbent	Ammonia	-		
Brewing agent Fermentation regulator		4		
Filtration aid	Phosphate			
Processing agent Quality improver, etc.	Ammonium Sulfate			
		All foods		
	Asparaginase Calcium Citrate	All foods	as Ca	
	Calcium Dihydrogen Phosphate		1.0% The above limits	Only when indispensable for manufacturing or processing
	Calcium Dihydrogen		do not apply to foods approved to	the food, or when used for nutritive purposes.
	Pyrophosphate Calcium Hydroxide		be labeled as ″special. dietary	nutruive purposes.
			use.″	
	Calcium Monohydrogen Phosphate			
	Calcium Silicate	capsules and tablets as foods for specified health uses and foods with nutrient function claims		Not permitted in human milk substitutes or weaning foods
		Other foods	2.00% When used with Silicon Dioxide (fine), the total amount shall not be more than 2.0 %:	
	Calcium Stearate	All foods		
	Carbon Dioxide	1		
	Diammonium Hydrogen	1		
	Phosphate	ļ		
	Dipotassium Hydrogen			
	Phosphate			
	Disodium Dihydrogen			
	Pyrophosphate	4		
	Disodium Hydrogen			
	Phosphate	4		
	Hydroxypropyl Cellulose			
	Hydroxypropyl	All foods	1	1

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
iscellaneous Absorbent Brewing agent Fermentation regulator Filtration aid	Hydrochloric Acid	All foods		Shall be neutralized or removed before the preparation of the finished food.
Processing agent Quality improver, etc. (continued)	Ion Exchange Resins	All foods		Shall be removed before the preparation of the finished food.
	Isopropanol See the section, "Flavoring agents".	Нор	20g/kg Hop extract	Only for extracting Hop extract is limited to the substance that is added to the wort during the manufacturing of beer and lo malt beer (including sparkling liquor).
		Fish meat	0.25g/kg Fish protein concentrate	Fish protein concentrate is fish meat from which the moisture and fat are remove
		Other foods	0.2g/kg Extracts of other foods	Extracts of other foods and products made of these extracts (except products made of hop extract and fish protein concentrate).
	Liquid Paraffin	Bread	as residue limit less than	Only for releasing dough in dividing by automatic dispenser or in baking.
	Magnesium Carbonate	All foods		
	Magnesium Chloride	-		
	Magnesium Monohydrogen Phosphate Magnesium Oxide	-		
	Magnesium Stearate	All foods		Only for capsules,tablets,etc.which ar not usual food forms as well as tablet confectionery.
	Magnesium Silicate	All foods		Only as filtration aid for fats oil . Shall be removed before the preparation of the finished food.
	Magnesium Sulfate	All foods		
	Natamycin	Natural Cheese (confined to the surface of hard and semi-hard cheeses)	less than 0.020 g/k	g
	Nitrous Oxide	Whip creams (referring to products obtained by whipping foods composed mainly of milk fat or foods made mainly of milk fat substitutes).		
	Oxalic Acid	All foods		Shall be removed before the preparation of the finished food.
	Phosphoric Acid	All foods		
	Polyvinylpolypyrrolidone			Only as filtration aid. Shall be removed before the preparation of the finished food.
	Potassium Dihydrogen	All foods		
	Phosphate			
		1	1	Shall be neutralized or
	Potassium Hydroxide	All foods		removed before the pre- paration of the finished food
	Potassium Hydroxide Potassium Metaphosphate	All foods		
			0.20 g/L of raw mil	paration of the finished food
	Potassium Metaphosphate	All foods Cheese	0.20 g/L of raw mil 0.10 g/L of raw ma	paration of the finished food
	Potassium Metaphosphate	All foods	0.20 g/L of raw mil 0.10 g/L of raw ma	paration of the finished food

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
scellaneous Absorbent Brewing agent Fermentation regulator Filtration aid	Silicon Dioxide	All foods		Only as filtration aid. Shall be removed before the preparation of the finished food.
Processing agent Quality improver, etc. (continued)	Silicon Dioxide (fine)	All foods	2.0 % When used with foods except capsules and tablets as foods for specified health uses and foods with nutrient function claims Calcium Silicate, the total amount shall not be more than 2.0 %:	Not permitted in human milk substitutes or weaning food
	Sodium Acetate	All foods		
	Sodium Carbonate			
	Sodium Dihydrogen	-		
	Phosphate			
	Sodium Hydroxide	All foods		Shall be neutralized or removed before the
	Sodium Hydroxide			preparation of the finished
	Solution			food.
	Sodium Metaphosphate	All foods		
	Sodium Methoxide	All foods		Shall be decomposed befor the preparation of the finish product, then the methanol produced during the decomposition shall be removed.
	Sodium Polyphosphate	All foods		
	Sodium Pyrophosphate			
	Sodium Sulfate			
	Sulfulic Acid	All foods		Shall be neutralized or removed before the preparation of the finished
	Zinc Sulfate	Sparkling liquor	as Zn 0.0010g∕kg	
	Tricalcium Phosphate	All foods	as Ca	
			1.0% The above limits do not apply to foods approved to be labeled as "special. dietary use."	Only when indispensable for manufacturing or processing the food, or when used for nutritive purposes.
	Trimagnesium Phosphate	All foods		
	Tripotassium Phosphate	7		
	Trisodium Phosphate	7		
	Water-insoluble minerals:			When two or more of the
	Acid Clay		as maximum residue limit	additives listed in this secti are used together, the total
	Bentonite			each residue amount shall r
	Diatomaceous Earth	All foods	0.50%	be more than 0.50 %.
	Kaolin		5.0 % *(when only	Only in case where its use
	Perlite		Talk is used in Chewing gum)	indispensable for manufactu or processing of food.
	Sand		e	
	Talk [*] Other Similar Substances			

Major Use Category	Additives	Target Foods	Maximum Limits	Limitation for Use
Miscellaneous Absorbent Brewing agent Fermentation regulator Filtration aid Processing agent Quality improver, etc. (continued)	Ammonium Hydrogen Sulfite Water	Grape juice for winemaking Wine	as Ammonium Hydrogen Sulfite, not more than 0.2g per 1L of wine Sulfur Dioxide shall not remain in excess of 0.35g per 1kg of wine (excluding squeezed grape juice for winemaking containing 1% by volume or more of ethanol and its concentrate).	When used for grape juice for wine making, the additive is deemed to be used in wine.
	Calcium Carbonate II * *The specifications of the already designated Calcium Carbonate has been renamed those of Calcium Carbonate I and separate specifications have been formulated with the name of Calcium Carbonate II. (Revision on 4 Dec. ,2020)	Grape juice for winemaking Wine		
	Calcium Phytate	Wine	not more than 0.08g per 1L of wine	
	Calcium L-Tartrate	Wine	not more than 2.0g per 1L of wine	
	Chitin-Glucan	Grape juice for winemaking Wine	not more than 5g per 1L of wine	Shall be removed before the preparation of the finished food.
	Copolymer of Vinylimidazole/Vinylpyrrolidone	Grape juice for winemaking Wine	not more than 0.50g per 1L of wine	When used for grape juice for wine making, the additive is deemed to be used in wine. Shall be removed before the preparation of the finished food.
	Cupric Sulfate	Wine	as Copper(II) sulfate pentahydrate, not more than 10mg per 1L of wine Copper shall not remain in excess of 2 mg per 1L of wine.	1000.
	Dipotassium DL-Tartrate	Wine		
	Dipotassium L-Tartrate	Grape juice for winemaking Wine		
	Metatartaric Acid	Wine	not more than 0.10g per 1kg of wine	
	Potassium Ferrocyanide	Wine	Anhydrous Potassium Ferrocyanide shall not remain in ecess of 0.001g per 1L of wine	
	Potassium Hydrogen Carbonate	Grape juice for winemaking Wine
